

Smart Lighting Solutions Digital As-Built employs an Advanced Provisioning Platform (APP) to deliver faster, error-free startup and documentation that are critical to the initial success and on-going maintenance of addressable lighting control systems.

## **PLATFORM INCLUDES:**

### **MOBILE DEVICE APP**

- Super simple to use
- IOS or Android compatible

### **WORKBOOK**

- Well organized and quick scan to digital documents
- Spot to record each networked device bar code or QR code (MAC ID)
- Each page recorded with single scan by mobile device app

### **AUTO-GENERATION OF DOCUMENTS**

- Digital punch list
- Digital as-built documentation

### **DASHBOARD**

- Status of Installation – percentage of networked devices installed and scanned
- Status of Qualified – percentage of networked devices Installed that have been verified for network communication, named and programmed per sequence of operation
- Status of Complete – percentage of networked devices Installed & Qualified that have been tested to perform per the sequence of operation

### **BENEFITS:**

- No more lost drawings or sticker maps
- Accurate and timely as-built drawings
- Less labor to record and scan bar codes
- Easier to maintain

### **DELIVERABLES:**

- Workbook with project login credentials & QR Code link to project for iOS & Android
- Electronic copy of Project drawings that match Workbook Device # (PDF)

### **PART NUMBER:**

**SLS DASB #####**

##### = the number of networked devices

### **ADDITIONAL NOTES AND CLARIFICATIONS:**

- *Lead Time without additional cost: Fifteen (15) business days*
- *Access to Platform expires after one (1) year service warranty or two (2) years from date of purchase whichever is first. Additional access can be purchased or included in an Annual Service Plan (ASP).*
